14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶ On March 1, 2021, Switch, Inc.'s board of directors approved and declared a quarterly cash distribution of \$0.05 per share on Switch, Inc.'s Class A common stock, payable on March 26, 2021 to shareholders of record as of March 16, 2021.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ Based on our reasonable assumptions about our income, deductions and activities in 2021, we should not have any current or accumulated earnings or profits in 2021. Distributions in excess of our current and accumulated earnings and profits should reduce the adjusted tax basis on our shares pursuant to Internal Revenue Code (IRC) §301(c)(2) and §316(a). Accordingly, since all of the March 26, 2021 distribution should be in excess of our current and accumulated earnings and profits, each shareholder's basis in our commons shares should be reduced by \$0.05 per share. Pursuant to the applicable Treasury Regulations under Section 6045B of the IRC, if our assumptions are incorrect we will provide a revised Form 8937 within 45 days of such determination.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ Based on our reasonable assumptions about our income, deductions and activities in 2021, we should not have any current or accumulated earnings or profits in 2021. Accordingly, all of the March 26, 2021 distribution should reduce each shareholder's basis in our common stock with any distributions in excess of a shareholder's basis treated as capital gain.
